SECTION 1: PROTOCOL FOR MAJOR STRUCTURAL DAMAGE (Class: 4_damage_major)

Trigger: When the AI detects *"Collapsed Building"* or *"Destroyed Infrastructure."*

Immediate Action:

- **Do NOT enter the structure.** Aftershocks or settling debris can cause secondary collapse.
- **Silence:** If you are near trapped victims, maintain silence to hear tapping or cries for help.
- **Utility Shutoff:** Immediately shut off gas and main electricity valves if accessible from outside.
- **Call 1122:** Report *"Structural Collapse"* and estimated number of victims.
- **Search & Rescue (SAR):** Do not attempt heavy lifting without equipment. Use the **"Call and Listen"** method.

SECTION 2: PROTOCOL FOR URBAN FIRE & SMOKE (Class: 2_fire_smoke)

Trigger: When the AI detects *"Active Fire"* or *"Heavy Smoke."*

Immediate Action:

- **Evacuation:** Move *upwind* and *uphill* from the smoke. Smoke inhalation kills faster than fire.
- **Touch Test:** Before opening doors, check for heat with the back of your hand.
- **Low Crawl:** If trapped inside, crawl low under the smoke layer where air is cleaner.
- **Containment:** Close doors behind you to slow the spread of fire.
- **Resources:** Use **Class A/B extinguishers** for small fires only. If the fire is larger than a wastebasket, **evacuate**.

SECTION 3: PROTOCOL FOR FLOOD SITUATIONS (Class: 1_flood_water)

Trigger: When the AI detects *"Flood Water"* or *"Submerged Roads."*

Immediate Action:

- **Electrical Hazard:** Turn off main power at the breaker box before water enters the home. Do not touch electric equipment if you are wet or standing in water.
- **Hygiene:** Do NOT walk through flood water; it often contains sewage, chemicals, and sharp debris.
- **Vertical Evacuation:** Move to the roof or highest floor. Do not climb into a closed attic (you may get trapped by rising water).
- **Driving:** *"Turn Around, Don't Drown."*
    - 6 inches of moving water can knock over an adult.
    - 12 inches can float a car.

SECTION 4: PROTOCOL FOR MINOR STRUCTURAL DAMAGE (Class: 3_damage_minor)

Trigger: When the AI detects *"Cracked Walls," "Broken Windows,"* or *"Roof Damage."*

Immediate Action:

- **Visual Inspection:** Check for **"X" cracks** in walls, which indicate structural shear stress.
- **Weatherproofing:** Cover broken windows or roof holes with tarps to prevent water damage.
- **Gas Check:** Smell for gas (rotten egg smell). If detected, **leave immediately**.
- **Documentation:** Take photos of all damage for insurance/government aid claims before cleaning up.

SECTION 5: DISASTER PREPAREDNESS (Class: 0_no_damage)

Trigger: When the AI detects *"Safe / No Damage"* but the user is in a risk zone.

Immediate Action:

- **Go-Bag Check:** Ensure you have water (1 gallon per person/day), non-perishable food, and a flashlight ready.
- **Communication Plan:** Establish a family meeting point if communications go down.
- **Battery Power:** Charge all power banks and phones immediately while grid power is available.
